

Biogas Generation Projects

Projects

EBP has a multidisciplinary team qualified to provide technology solutions for biogas generation. We work in partnership with an European company with recognized know-how in the sector. Our projects are conceived within the reality of the Brazilian market, following the global requirements of sustainability and local engineering standards.

We act in all stages of the project:

- Conceptual engineering
- Basic engineering
- Detailed engineering
- Identification of investors and support in business structuring
- Construction management
- Operation
