

Emergency Plan

Depending on the characteristics of the facility, associated with the accidental scenarios raised in the Risk Analysis Study or the Preliminary Hazard Analysis, an action plan is developed, providing quick and effective responses to possible emergencies inside and outside the facility, detailed technical and organizational procedures can reduce the effects and damage to people, property, and the environment.

Within the emergency action plan, human, material and financial resources, relevant risk scenarios, assignments of each member, ongoing team training, simulations, and continuous improvement of the plan shall be provided.

For some facilities complementary plans are necessary such as:

- Individual Action Plan (IAP)
- Mutual Aid Plan (WFP)
- Contingency Plan (CP)
- Security Plan for Panic Situations (PSSP)
